

BurgerDisk Smartport Hard Disk for Apple II

Quickstart

Thank you for getting a BurgerDisk! I hope you will like it.

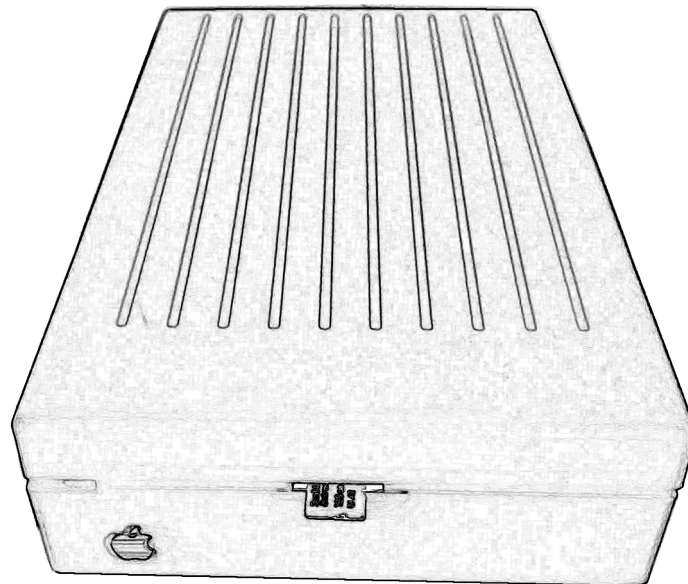

Quick pointers to start using it:

The User Manual is available at
<https://www.colino.net/wordpress/wp-content/burgerdisk-user-manual.pdf>

Assembly instructions are available at
https://github.com/colinleroy/BurgerDisk/tree/main/build_instructions

Your enclosure comes with a 3D-printed Apple logo taped to it. You can either glue it, or remove it and glue a real vintage Apple logo if you have one available.

Have fun!

Kit contents

Small components taped here

R2 150 Ω	R1 330 Ω	D1 removed	D2 1N4448	D3 1N5818	R4 10k Ω	R5 1k Ω	R3 470 Ω
		Errata: D1 was an issue with SoftSP cards. Solder a leg from another component instead.
